PennHIP Report

Referring Veterinarian: Dr John Cathoun
Email: technician@idahovethospital.com

Clinic Name: Idaho Veterinary Hospital
Clinic Address: 1420 Midland Blvd.
Nampa, ID 83651
Phone: (208) 466-4614
Fax: (208) 466-1375

Patient Information

Client: Charters, Cathy
Patient Name: Power
Reg. Name:
PennHIP Num: 130667
Species: Canine
Date of Birth: 06 Aug 2018
Sex: Male
Date of Study: 28 May 2019
Date of Report: 29 May 2019

Tattoo Num:
Patient ID: 32791-53
Registration Num: DN56421502
Microchip Num: 981020031240275
Breed: AUSTRALIAN SHEPHERD
Age: 9 months
Weight: 49.5 lbs/22.5 kgs
Date Submitted: 29 May 2019

Findings

Distraction Index (DI): Right DI = 0.31, Left DI = 0.34.
Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.34.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 1393 canine patients of the AUSTRALIAN SHEPHERD breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.26 - 0.77) for the breed. The breed average DI is 0.47 (solid square). The patient DI is the solid circle (0.34).

SUMMARY: The degree of laxity (DI = 0.34) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
